THE PLATFORM

Every case and every riyal, in one system.

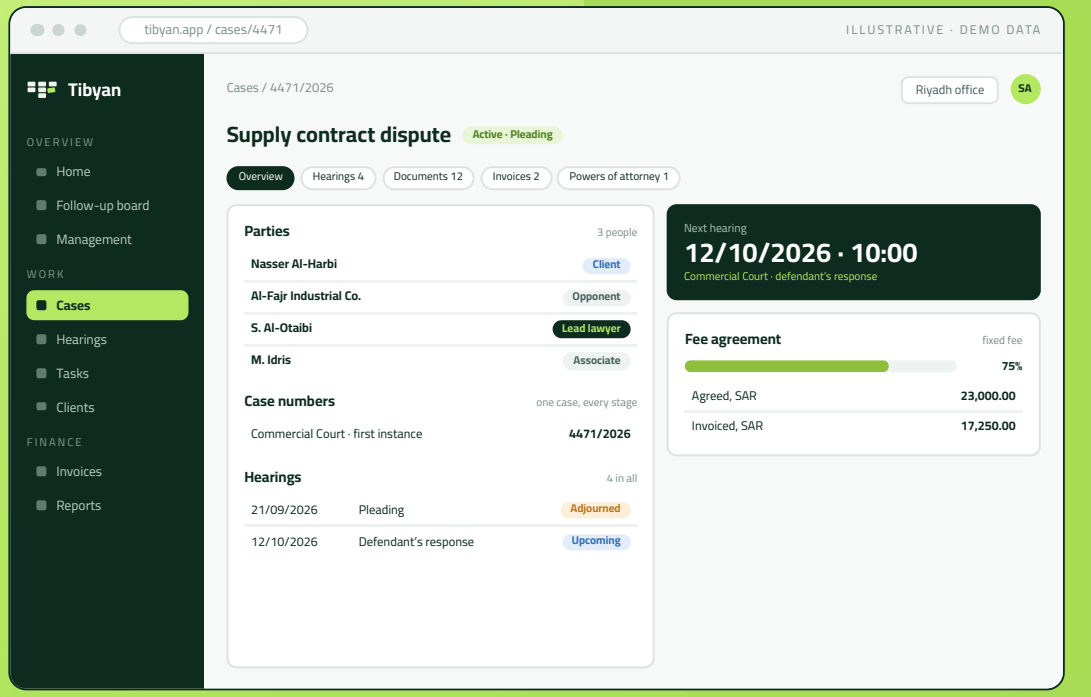

Tibyan is a practice management system for law firms.

Enter a fact once, and find it wherever you need it.

The partner, the lawyer, the accountant and the client work from the same record, each through their own view.

- Arabic first, right to left
- One office or many branches
- Double-entry accounting
- Portals for lawyers and clients

ILLUSTRATIVE · DEMO DATA

The problem ↗

The calendar says one thing. The court said another.

Hearings in a shared calendar, fees in another file, documents in a colleague's inbox, and the client's latest news on one lawyer's phone.

What the shared calendar says

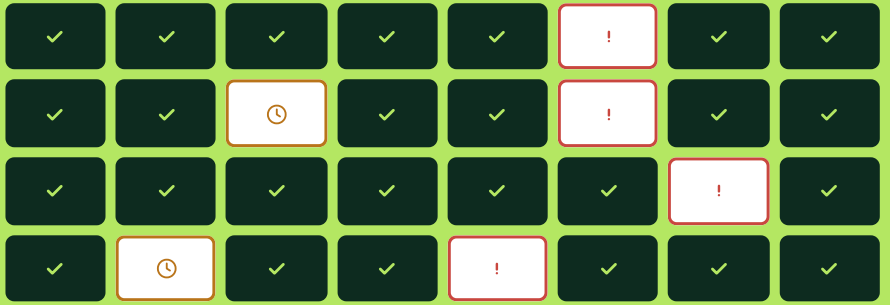

32 HEARINGS THIS MONTH

Entered once, and rarely updated after the hearing

What actually happened

THE SAME 32

26 outcome recorded 4 held, nothing written down 2 adjourned, no new date

The usual fix is a weekly meeting and a group chat: hearings recalled from memory, invoices chased by phone, and a client calling to ask what happened before anyone has written it down. **A calendar you cannot trust is not a calendar you can run an office on.**

How it works ↗

Three steps, and nothing written twice.

Open the case, follow the dates, record what happened. Tibyan links each step to the next: the hearing to the calendar, the fees to the invoice, and the invoice to the books.

4471/2026
Commercial Court · 4 parties

01 · OPEN

The case file

The parties, clients and opponents alike, the team of lawyers on it, its numbers at each court and its fee agreement, all in one file. The agreement prints straight from your office's template.

12/10/2026 · 10:00
Next hearing, set on adjournment

02 · FOLLOW

The calendar

Hearings, tasks, meetings and consultations in one calendar. Record a hearing's outcome, and if it was adjourned, set the next date in the same moment.

INV-2026-001412
SAR 11,500.00 · entry posted

03 · BILL

The books

Issue the agreed fee invoice, record the receipt, charge the expense to the client. Every document posts its journal entry the moment it is saved.

Underneath it all is one record. The case in the office register is the same case on the lawyer's phone, in the client portal and in the morning agenda email. Permissions decide who sees what.

YOUR TIME

Every minute you spend following up on admin is a minute taken from your professional time.

Between court hearings, drafting memoranda, client meetings and keeping track of dates, the responsibilities multiply, and focus becomes the challenge.

With **Tibyan**, your legal work is organised on one platform.

A calendar that brings together your appointments, hearings and tasks, and your case files at hand with all their details and documents.

Record hearing outcomes, set the next dates, and follow your work from one place.

> **Because the value of a lawyer's time lies in their legal expertise, not in being busy with admin.**

CHAPTER

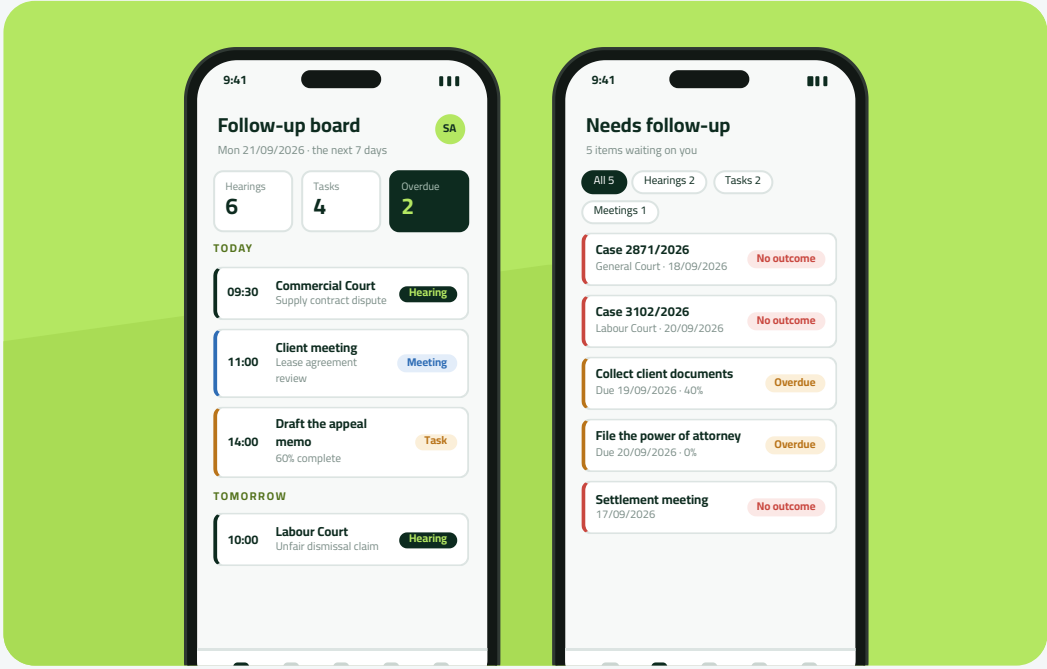

01

Tibyan...
Focus on your cases, and leave managing the details to Tibyan.

The lawyer’s day, on their phone.

The lawyer portal ↗

The next seven days of hearings, tasks and meetings, what is overdue, and the caseload of the lawyer who signed in, and nobody else’s.

Left, the week and today at a glance. Right, what is waiting on this lawyer. Both screens are designed for the phone.

01 · THE SEVEN DAYS

The week on one screen

Every hearing, task, meeting and consultation on its day. A task that runs all week appears once, among the tasks in progress.

02 · WHAT IS LATE

Nothing slips past

A hearing that passed without an outcome, or a task past its date and not done, shows as overdue by itself.

03 · THE MORNING EMAIL

The agenda in your inbox

A daily message at the hour the office chooses, with today’s, tomorrow’s and the coming days’ appointments, times and places.

04 · A SEPARATE PERMISSION

Viewing is not editing

The board shows the whole picture without allowing edits; changes are made from the lawyer portal. The office grants each.

● ILLUSTRATIVE · DEMO DATA

The case ↗

The whole case, in one file.

A case is not a number on a list. It is its parties, its courts, its hearings, its papers and its agreed fees, and Tibyan keeps them together.

Parties

Any number of clients and opponents, and the team of lawyers handling the case, each in their role.

Case numbers

A number for each court and stage, so the case stays one case from first instance through appeal.

Hearings

Every hearing with its court, reason and outcome. An adjournment sets the date of the next one.

Documents

Folders and files for each case. Every file is either shared with the client or kept internal.

Fee agreement

Fixed or percentage fees, and an agreement printed in Arabic or English from your office's template.

Powers of attorney

Each one on file with its expiry date, and flagged thirty days before it lapses.

The hearing ↗

The hearing, and its outcome.

Record a hearing's outcome in one window, and if it was adjourned, set the next date the moment the hearing ends.

01 · ONE WINDOW

The outcome sits on the hearing

Write it on the hearing itself, from the register, the case page or the lawyer portal. No separate minutes file to keep in step.

02 · THE NEXT HEARING

An adjournment sets the next date

The next hearing goes into the calendar from the same window, so no case drops out of the diary.

03 · CLIENT VISIBILITY

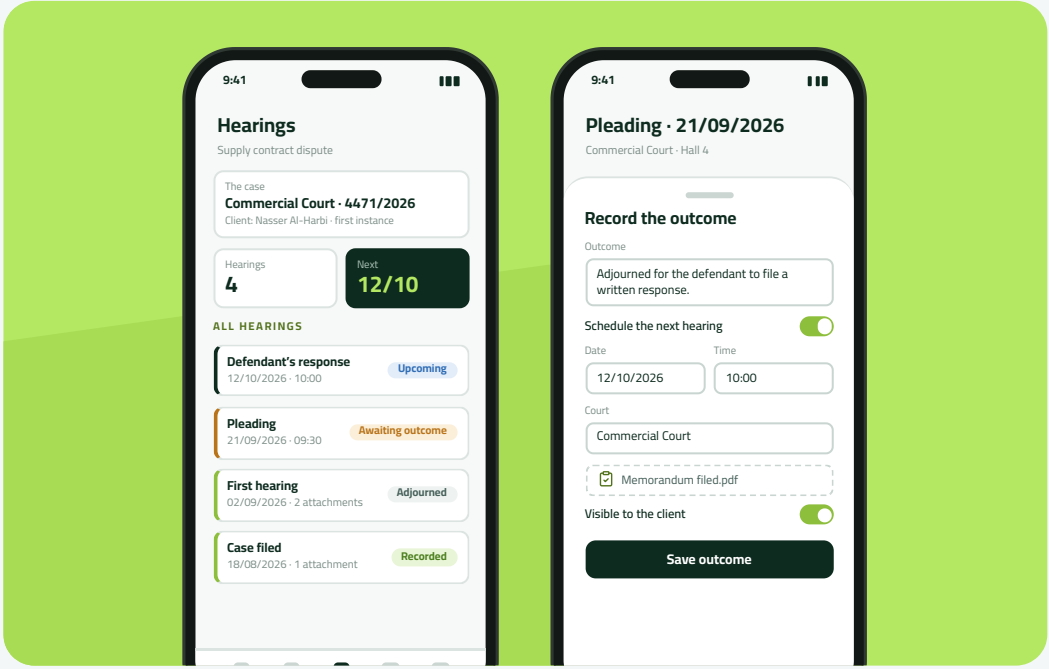

The office decides what the client sees

Every hearing, document and case number has a visibility switch. Nothing reaches the client portal unless the office allows it.

04 · ATTACHMENTS

Papers stay with their hearing

The judgment, the memorandum and the notice of service are attached to the hearing they belong to.

Left, the case's hearings and the state of each. Right, the outcome window. The next hearing is set from the same window.

● ILLUSTRATIVE · DEMO DATA

Follow-up ↗

Six things every office forgets, and won't any more.

Nobody needs to keep a list of what is late. Tibyan reads it straight from the records, so the managing partner and the legal assistant see the same list.

HEARINGS

7

No outcome

Held, and nobody wrote down what was decided.

TASKS

12

Overdue

Past their date and not yet done.

MEETINGS

3

No outcome

The meeting happened and nothing was recorded.

CASES

9

No next hearing

An active case with no next hearing in the calendar.

INVOICES

5

Overdue

Issued, unpaid and past their due date.

POWERS OF ATTORNEY

4

Lapsing soon

Lapsing within the next 30 days.

NO STATUS TO FORGET

Late appears by itself

Being late is not a status someone sets by hand and then forgets. It appears when the date passes with nothing recorded.

EVERY NUMBER OPENS ITS LIST

From the count to the records

The counts above are this office's dashboard today. One click on any of them opens the records behind it, with the lawyer on each.

YOUR CLIENTS

Your client is not only waiting for the result… they expect to be kept up to date on their case.

And with many cases and many clients, organised communication becomes a core part of the quality of legal service.

With **Tibyan**, give every client a private online portal to follow their cases, their hearing dates and outcomes, see their invoices and exchange documents with your office.

All within the permissions you set.

Clear information, documented updates, and communication that reflects the professionalism of your legal services.

CHAPTER

02

Tibyan…
A client experience worthy of your office’s professionalism.

THE CLIENT PORTAL

The client knows before they call.

A client's first question is what happened. The portal answers it before they pick up the phone, and shows only what the office allows.

Their cases

Case details, with their hearings, meetings and case numbers.

Their invoices

The client's issued invoices, matching the printed copy the office holds.

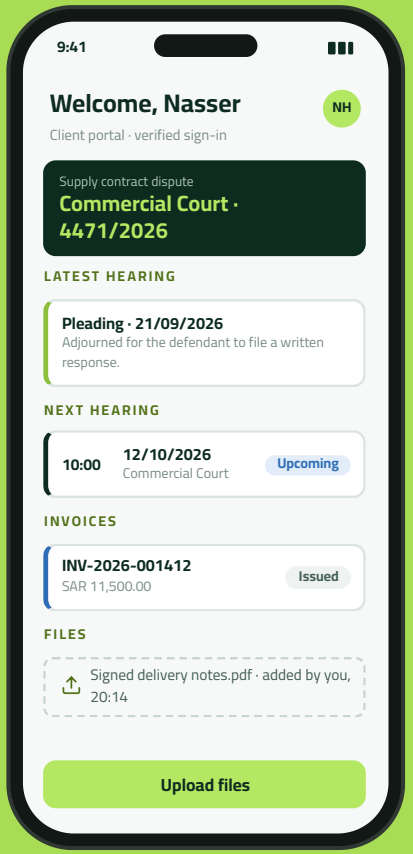

Files, both ways

They see what the office shares and upload their own, with a record of who added what, and when.

Updates by email

The system sends client notifications on the office's behalf.

● ILLUSTRATIVE · DEMO DATA

YOUR TEAM

Managing legal work does not stop at assigning cases… it starts with being able to follow every detail of them.

Where have the cases got to? Which tasks are overdue? And how is the work progressing across your legal team?

With **Tibyan**, the picture is clearer.

One management dashboard gives you a full view of cases, hearings, tasks and performance indicators.

Follow the work by lawyer, branch or period, review the details, and see what needs following up.

Organised information, clear responsibilities, and indicators that help you decide at the right time.

CHAPTER

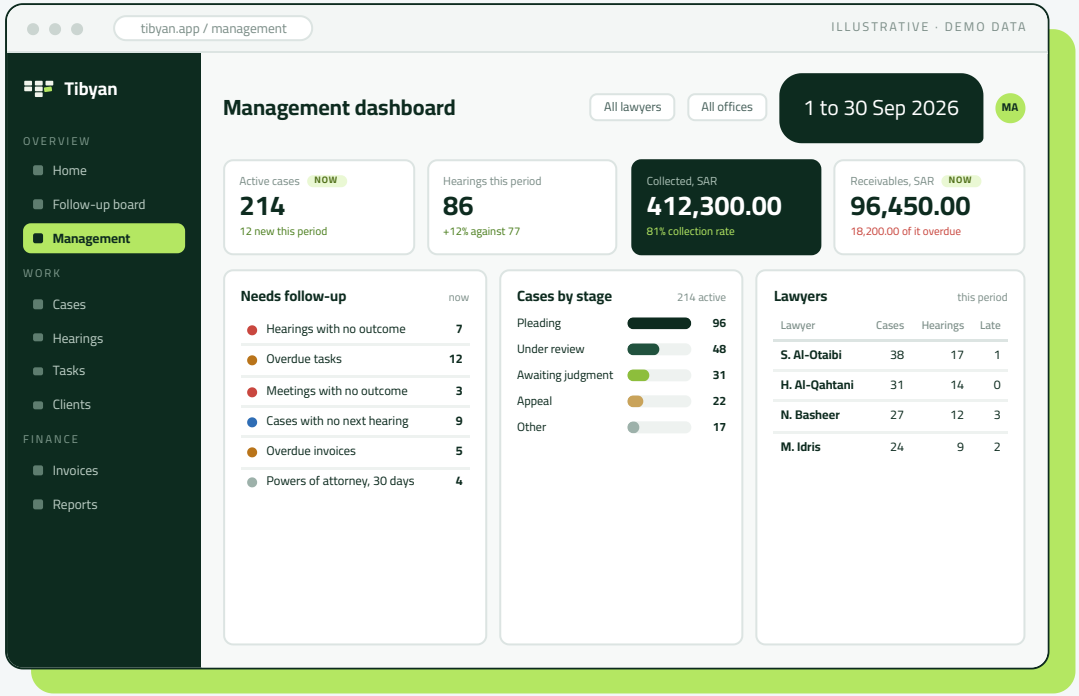

03

Tibyan…
An integrated view of your work, and more control over managing your legal team.

The whole office, on one screen.

For the managing partner ↗

Filtered by lawyer, office and period: where things stand now, what changed since the last period, and what needs following up.

September 2026, all lawyers and all offices. Every figure opens the list of records behind it.

01 · NOW AND THE PERIOD

Two kinds of figure

Figures that describe the current state carry a Now badge; period figures are compared with the period before.

02 · NEEDS FOLLOW-UP

The list beside the figures

The follow-up list sits beside the figures, and every number on it opens the records behind it.

03 · BY LAWYER

Each lawyer's caseload

Cases by stage, and each lawyer's cases, hearings and late items. The whole dashboard filters to one lawyer.

04 · PERMISSIONS

Amounts by permission

Amounts appear only to those allowed to see them. A colleague without that permission sees the work, not the money.

● ILLUSTRATIVE · DEMO DATA

YOUR FINANCES

Managing cases creates professional value… and organised financial management helps you follow its returns.

Fee agreements, invoices, receivables and expenses: financial details that matter as much as following the cases themselves.

With **Tibyan**, your legal work is linked to your financial management in one system.

From recording fees and issuing invoices to receipts, expenses and journal entries.

Follow what has been collected, what remains and what is overdue, and see your financial reports within the permissions set.

> **So you know where your work stands financially, just as you know where your cases stand.**

CHAPTER

04

Tibyan…
Legal and financial management, in one system.

Finance ↗

Real accounting, inside the system, not beside it.

Every invoice, receipt, expense and income posts its journal entry the moment it is saved. The number on the screen is the number in the books.

01 · DOUBLE ENTRY

A ledger behind every document

A full chart of accounts, journal and general ledger. Debits and credits are checked to balance before an entry is saved.

02 · REVERSED, NEVER EDITED

Nothing changed out of sight

A posted entry is never edited. A cancelled invoice keeps its number and has its entry reversed; a correction is a credit note.

03 · EVERY DOCUMENT HAS ITS BRANCH

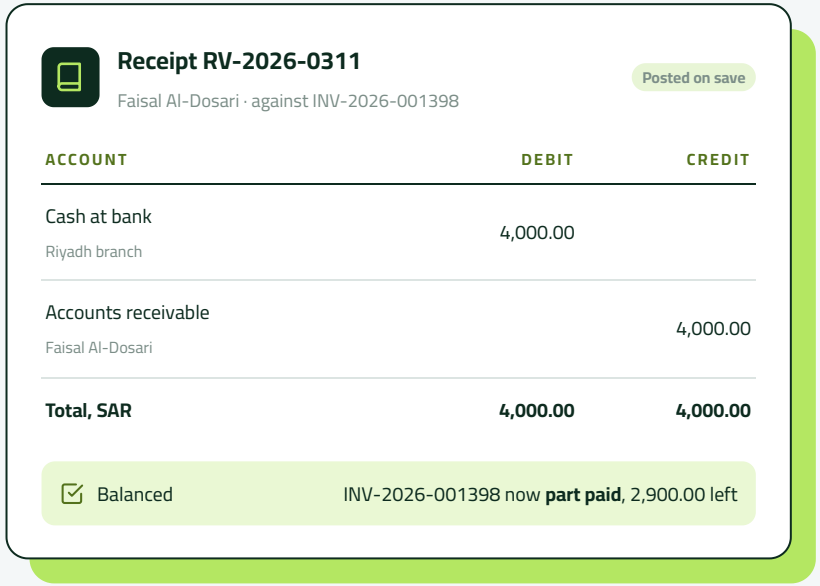

Each branch reads on its own

Each document prints on its branch's letterhead, with that branch's logo and VAT number.

04 · QR CODE ON THE TAX INVOICE

E-invoicing, phase one

Tax invoices carry a QR code, in line with the first phase of ZATCA's e-invoicing requirements.

A receipt against a SAR 6,900.00 invoice. The entry was written by the receipt, not by hand.

● ILLUSTRATIVE · DEMO DATA

For finance ↗

Every invoice, and what is still owed.

Every invoice in one register: issued, partly paid, paid or overdue, with the balance still outstanding and the case it belongs to.

01 · ONE STEP

A number and an entry together

An invoice takes its number and its journal entry in one step: no numbered invoice without an entry behind it.

02 · PART PAID

Receipts close the balance

A receipt posts its own entry and moves the invoice to part paid or paid, with the balance left to collect.

03 · OVERDUE BY ITSELF

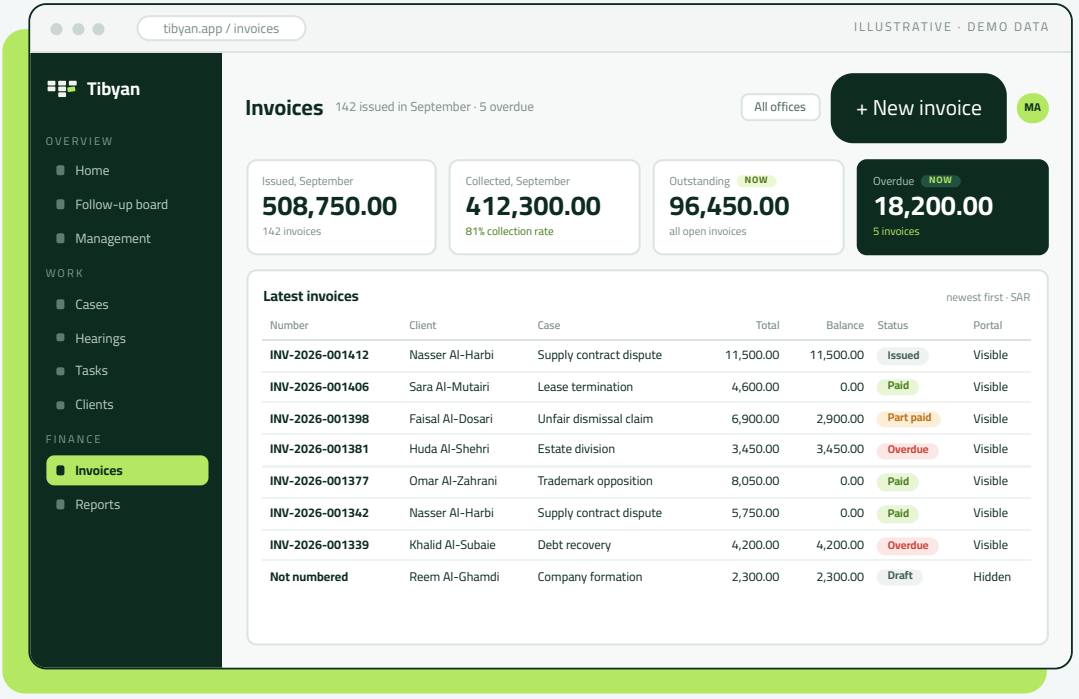

Late without anyone saying so

Unpaid past its due date, an invoice shows as overdue here and on the managing partner's dashboard.

04 · DRAFTS

Nothing reaches the client until it is issued

A draft waits unnumbered and hidden from the client portal. A correction goes through a credit note everyone can see.

September 2026: 142 invoices issued for SAR 508,750.00, 81% collected. The register and the books agree, because they are one record.

● ILLUSTRATIVE · DEMO DATA

Access ↗

Three doors, one record.

The office, the lawyer and the client each have their own way in, and each sees what their work needs.

01 · THE OFFICE

The office system

Every record, report and setting, for partners, lawyers, accountants and staff, each according to their role.

- Cases, appointments and client files
- Finance and accounting
- The management dashboard
- Roles, templates and settings

02 · THE LAWYER

The lawyer portal

A lawyer's own hearings, tasks, meetings and cases, designed for the phone.

- Their calendar
- Recording outcomes
- The morning agenda email
- The follow-up board

03 · THE CLIENT

The client portal

The client follows their own cases, hearings, invoices and powers of attorney.

- Only what the office allows
- Their invoices
- Files uploaded to the office
- A separate sign-in, with verification

One record. The same case behind every door. Permissions decide who sees what.

Four roles, one system.

Each role opens Tibyan to its own work, and every one of them is working from the same record.

- Law firms
- Multi-branch firms
- Independent lawyers
- Legal consultancies
- Arabic first, English ready

The managing partner

A dashboard of the whole office by lawyer and branch, collections against agreed fees, and the outstanding work and who owns it.

The lawyers

Their week on their phone, the outcome recorded as soon as the online session ends, and the day's agenda in their inbox.

Finance and accounts

Invoices, receipts and expenses that post their own entries, a trial balance, and a client statement that agrees with the ledger.

Office management

One calendar for the whole office, administrative work broken into tasks, and powers of attorney tracked until they expire.

Behind every well-crafted legal opinion… research, analysis and a precise understanding of the question.

And as artificial intelligence tools develop, help with legal research is closer to hand.

Meet **Najeeb**, the intelligent legal research assistant inside the Tibyan platform.

Ask your legal questions in Arabic or English, and choose the level of answer that suits your research: quick, balanced or in depth.

And keep your conversations to come back to when you need them.

Najeeb helps you research, and leaves the assessment and the final legal opinion to your professional expertise.

CHAPTER

05

Najeeb from Tibyan…
AI that supports
your legal expertise.

AI ↗

NAJEEB · BUILT INTO TIBYAN

Ask Najeeb any legal question.

Najeeb is the AI legal research assistant inside Tibyan. Ask in Arabic or English, and choose the depth that suits the question.

01 · THREE DEPTHS

Quick, balanced or in depth

A quick check before a meeting, or a fuller answer to read before a hearing.

02 · IT ADVISES, IT DOES NOT DECIDE

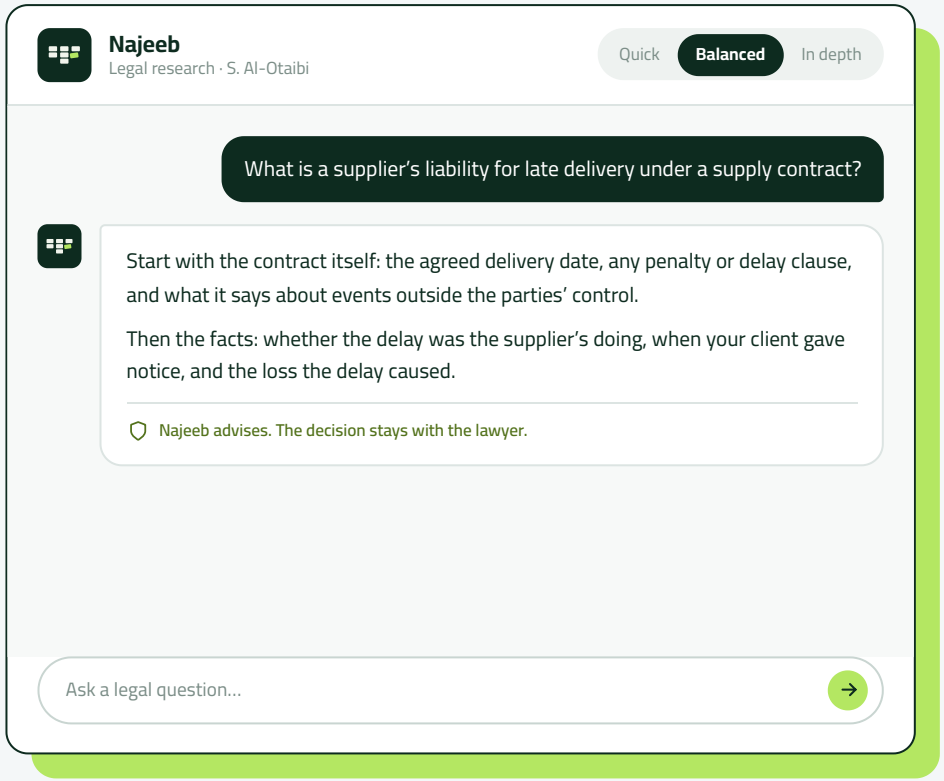

It changes nothing

Najeeb reads and answers. Cases, hearings, invoices and the ledger stay in the hands of the people responsible for them.

03 · A PERMISSION LIKE ANY OTHER

Granted by role, kept by lawyer

Access is granted by role, and each lawyer's conversations are kept in their own history.

WHY WATHIB

The software is the easy part.

An office does not move to a new system by installing it. It moves when its people are at home in it, and that is the part we work on with you.

From Riyadh

A Saudi company and a Saudi team. Setup, training and support in Arabic.

One accountable party

The system, the setup and the training are all Wathib's responsibility. One company, not a supplier for each layer.

Arabic from the first screen

Right-to-left was a requirement from the start, not a translation pass, and English is one click away.

One office first

Start with a single office. Each branch after it opens with its own letterhead, logo and VAT number, on the same record.

Tibyan

LAW FIRM MANAGEMENT

You argue the case.
Tibyan follows it up.
